

The Tobacco-Related Disease Research Program Presents:

TRDRP Trainee Showcase @ SRNT

Open to the Public

No registration required, free snacks and no-host bar

Thursday, February 21, 2019, 5:15-6:15 pm

Hilton San Francisco Union Square

Room Continental 5 (Tower 3)

333 O'Farrell Street, San Francisco

One block from Powell Street Station for BART and MUNI transit lines

Come join us at this **free event** at the Society for Research on Nicotine and Tobacco ([SRNT](#)) [annual meeting](#) in San Francisco. We are excited to host six graduate students and post-docs, funded by TRDRP to do research that will advance our knowledge of tobacco prevention and treatment and tobacco-related diseases. Enjoy their presentations – they are ready to communicate their research in a short and fun format, to get your attention and get you as excited as they are about their research.

Agenda

Ginny Delaney, PhD, TRDRP	Welcome
Shannon Watkins, PhD, UCSF	Menthol, mango, and crème brûlée: The role of flavors in the tobacco epidemic
Joe Zhang, PhD, Stanford University	Our Genes & Nicotine: How gene variation affects cardiac function
Nicole Sparks, PhD, UC Riverside	Bad to the Bone: How tobacco affects skeletal development
Matthew Stone, UCSD	Graphic Warnings on Cigarette Packs: What's the Cost?
Sreelakshmi Vasudevan, PhD, UCSF	How does smoking affect the lung's cleanup crew?
Adam Witmer, UC Riverside	Breaking Down Data Barriers with Deep Learning
Uta Grieshammer, PhD, TRDRP	Closing Remarks
