*Delete instructional text from this template in your final document*

A. Personal Statement and Future Goals

*This supplement is to foster student research and allow active research training and mentoring in order to bring new workforce into the stated research priority areas of TRDRP. Use the section below to describe how your background and career goals align with the intent of this supplement.*

A.1. Personal Statement

- Describe your reasons for pursuing a career in tobacco prevention and control or tobacco-related research, or any research area covered under the current TRDRP research priorities.*
- Briefly describe the goals of the proposed research and your role on the project.*

**A.2. Future Goals in Tobacco Control or Tobacco-Related Research**

- *Describe in your own words your educational background, life experiences and/or other contributions to science, research or community that may be predictive of future success in your research career. Even if your participation in the proposed research project will be your first experience, describe your previous experiences that demonstrate your academic preparation and/or work ethic.*
- *State your career goals and describe how the proposed research or tobacco prevention and control training will further your advancement toward these goals. If applicable, describe how the proposed training may contribute towards ending California tobacco-related disease disparities.*
